DIPANSHU SAINI

Python Backend Developer | AI & LLM Systems

+91 7060770324 • contactmedipanshu@gmail.com • Noida, UP • linkedin.com/in/dipanshu-saini

PROFESSIONAL SUMMARY

Python Backend Developer with years of experience building scalable REST APIs, Django-based web applications, and production-grade AI systems. Hands-on expertise in RAG pipelines, LLM integrations, Docker, and GCP Cloud Run. Proven ability to own projects end-to-end - from architecture and development to deployment and maintenance.

TECHNICAL SKILLS & TOOLS

Languages: Python, JavaScript, SQL, HTML, CSS
Frameworks & Libraries: Django, FastAPI, Django REST Framework (DRF), LangChain
AI / LLM: RAG Architecture, Vector DB (FAISS, Pinecone), LLM API (Gemini, OpenAI), Prompt Engineering
Databases: MySQL, SQLite, PostgreSQL, Redis, Celery
DevOps & Cloud: Docker, GCP Cloud Run, Git, GitHub
Tools: Selenium, BeautifulSoup, GTM API, GA4, VS Code, Copilot, Cursor

EXPERIENCE

Software Engineer | MetricVibes, Noida *Oct 2024 – Mar 2026*

- Built and deployed QuerySafe, a production SaaS AI chatbot using RAG, FAISS, LangChain, and Gemini API & Django - serving contextual document-aware responses with role-based access control; deployed on GCP Cloud Run via Docker and GitHub.
- Developed AnalyticsAI, an internal tool using Python & GTM API to automate common analytics tag implementation - eliminating ~3 - 4 hrs of manual GTM/GA4 configuration effort per client project.
- Built customised WhatsApp and email marketing tool supporting cold outreach, warm sequences, and follow-up automation - reduced manual marketing effort by ~30%.
- Optimised the company website via UI improvements, JavaScript optimisation, and caching -reflected in a ~25% increase in user retention as tracked via GA4 analytics.

Web Developer Intern | Dakshaja Web Solution, Delhi *Feb 2024 – Aug 2024*

- Designed and delivered 10+ client full stack websites end-to-end - requirement gathering, development, deployment, and post-launch support across concurrent projects.
- Independently managed client communication and project timelines, maintaining 100% on-time delivery and high client satisfaction.

PROJECTS

QuerySafe - Personalized AI Chatbot - *Django · FAISS · LangChain · Gemini API · Docker · GCP Cloud Run*

- Implemented document ingestion pipeline with chunking, embedding generation, and semantic retrieval using FAISS vector database.
- Deployed on GCP Cloud Run via Dockerized GitHub-connected pipeline with role-based access and multi-turn conversation memory.

AnalyticsAI - Analytics Automation Tool - *Python · GTM API · GA4 · Selenium · BeautifulSoup*

- Built an internal tool to automate creation of common, predefined analytics tags in Google Tag Manager via the GTM API - replacing repetitive manual tag setup for every client.
- Reduced per-client analytics configuration time by ~3 - 4 hrs, enabling faster project delivery and consistent tag implementation standards.

EDUCATION

B.Tech - Computer Science Engineering *2020 – 2024*

S.D. College of Engineering & Technology, AKTU | CGPA: 7.18
